

Advantage Construction
18570 Buchanan Street
East Bethel, MN 55011

To whom it may concern:

I would highly recommend Advantage Construction for your commercial project. Advantage purchases their material through me at Lyman Roofing & Siding in St. Louis Park, Minnesota. I have dealt with contractors for 15 years and have seen what makes a contractor successful. Advantage Construction has these qualities, some of them including being professional at the jobsite, making sure the job is finished in the timeframe agreed on, and making sure the jobsite is clean when they are finished.

Advantage Construction is also current in paying their bills to Lyman Roofing & Siding, and is always timely in placing their orders.

Chris and his team are uniquely qualified to handle commercial projects. The combination of their manpower, strength in their management team, and overall knowledge and expertise in handling these projects is why I highly recommend Advantage Construction for your commercial project.

Sincerely,

Casey Bright
