

In 2019, our Homeowners' Association engaged Advantage Construction to repair storm damage which occurred to our buildings in 2018. I am a board member of this HOA and we worked with Advantage's representatives Josh Lungstrom and Matthew Vilven almost exclusively on a regular and often daily basis. This project replaced all roofing, siding, gutters, garage doors and some windows on seventeen buildings with thirty-four homeowners. Josh and Matt guided us from damage evaluation through completion of construction over a twelve month period. They were instrumental in working with our insurance adjuster, scheduling crews, assisting us in the selection of materials, and monitoring the entire process, from the initial financials to the details of final yard cleanup. I recommend them for their communication skills, knowledge of process/product, and their ability to react quickly and candidly to issues or questions that arise.
